

BACKPACK

Design by
LucidiPevere

Description

The Backpack armchair derives its distinctive personality from the slim, elegant structure/base which is the perfect foil for the perfectly-designed silhouette of its welcomingly thick and ergonomically-curved seat/back cushion. At the top of the back, the cushion rolls over on itself and is held in place by a strap on its back (red or black) which is evocative of the kind of backpack used by the explorers of yesteryear.

Moving the Backpack seating really is child's play: one is surprised by their lightness, which is not only visual but also real.

Technical Specifications

CONSTRUCTION

Structure in lacquered aluminium.

COMFORT

Seat and back cushions in high resilience Bultex foam (38 kg/m³ - 3.6 kPa), clad in 110 g/m² polyester quilting.

MAKING-UP

Covers are removable.

COVERING MATERIALS

Wide choice of covering materials.
