

BELEM

Design by

Didier Gomez

Description

Belem's taut lines are softened by the curve of the seat (note the elegant hammer-head shape) and back, whilst the high legs reinforce the overall lightness and delicacy. The high, deep seat (in foam) and 100 % feather-filled cushions combine to offer a high degree of comfort.

Technical Specifications

THE CONCEPT: Belem's taut lines are softened by the curve of the seat (note the elegant hammer-head shape) and back, whilst the high legs reinforce the overall lightness and delicacy. The high, deep seat (in foam) and 100 % feather-filled cushions combine to offer a high degree of comfort.

CONSTRUCTION: mechanically-welded wood-clad structure (backrest and back in MDF - panels of multiply on the sides). Feet in Epoxy black lacquered cast aluminium, equipped with gliders.

COMFORT: suspension of seat via hooked webbing. Seat cushion in high resilience polyurethane Bultex foam 38 kg/m³ - 3.6 kPa clad in 100 g/m² polyester quilting.

Back cushions are filled with new duck feathers (90 % feathers / 10 % down), compressibility H 88 mm, with core in high resilience polyurethane Bultex foam 30 kg/m³ - 1.8 kPa).

MAKING-UP: structure and cushions have removable covers. Back cushions may be specified in a different colour. The back cushion of the settees is priced separately to enable a number of different colours and/or covering materials to be combined within one settee.
