

HUDSON

Design by
Didier Gomez

Description

With this seventh model, Didier Gomez brings us a new seating solution for urban environments which marries visual lightness, remarkable compactness and exceptional comfort. Hudson's lines are clean, architected, geometric and functional, clearly asserting a direct line of descent from Mies van der Rohe and then Florence Knoll (1954). Sixty years later, Didier Gomez successfully revisits this design icon, magnifying the comfort whilst reducing the dimensions (the large settee going from 230 cm to 194 cm) and lightening the lines.

Technical Specifications

CONSTRUCTION

Each seat cushion has its own individual Pullmaflex suspension (layer of steel wires suspended from steel springs); each back cushion has its own individual horizontal elastic webbed suspension. Seat cushions in high resilience polyurethane multi-density Bultex foam, dominant density 38 kg/m3 - 3.6 kPa, with compartmented comfort layer (9 square compartments) filled with goose feathers (10 % down / 90 % feathers). Compartmented goose feather-filled back cushions (3 horizontal compartments) with core in polyurethane foam 26 kg/m3 - 1.4 kPa.

MAKING-UP

Baguette stitching on structure, armrests and cushions. Back cushions Padded back cushions with 4 points of decorative cross-shaped stitching. Removable covers (NB except leather and microfibres).

COVERING MATERIALS

Whilst a bicolour treatment for the back cushions is entirely possible, Didier Gomez favours a monocolour interpretation. Any covering material may be used (fabrics, leathers, microfibres), but these should preferably be plain.
