

LUCA SOFT

Design by

Jean-Philippe Nuel

Description

The Luca Soft range was designed as part of the Radisson Hotel Nantes project, in which the town's former Palais de Justice was transformed into a luxury hotel. To equip the restaurant, Jean-Philippe Nuel wanted a seat which retained the qualities of his Luca chair whilst bringing more femininity and finesse, along with curved lines to echo the layout of the bedrooms. Luca Soft, therefore, is a range of seating - armchairs and bridges - which offers great comfort and elegance, showing off the finesse of their curves to best effect. Although initially designed for a hotel, this range of seating will fit perfectly into any interior, whether contemporary or more classic, in a living room and/or around a table.

Technical Specifications
