

IKE

Design by
Studio Dreimann

Description
The IKE swivel stool stands on three legs. The steel tubular support for the thread of the endless screw splits into three to form the three legs. The 'studio' spirit of this technical base is softened by its white lacquer finish and harnessed by its natural oak seat.
Height-adjustable swivel stool. Seat in 20 mm natural varnished solid oak with thumbhole (for both ease of manipulation and to assist in adjusting the height between 41 and 55 cm). Screw support and endless screw in zinc-coated metal. Base in white lacquered steel. Protective gliders.
