

# ALUCHAIR

**Design by**  
Jacques Ferrier & Pauline Marchetti

**Description**  
Ligne Roset is manufacturing the 260 Aluchair chairs which were designed by Jacques Ferrier for the French Pavilion at the Shanghai World Expo (May - October 2010). This indoor/outdoor chair employs a combination of resistant materials such as aluminium and stainless steel for its base and injected plastic for its perforated shell (seat-back).

**Technical Specifications**  
**CONSTRUCTION**  
Structure, including rear foot, in laser-cut aluminium, with front foot in shaped stainless steel, all finished in satin-finish mastic, argile or éléphant lacquer.

**COMFORT:** perforated shell (seat/back) in injected plastic finished in satin-finish mastic or argile lacquer where the shell is in cream, or mastic where the shell is in grey. Apart from the decorative effect, the perforated detailing on the shell brings a degree of flexibility which optimises the comfort on offer, and enables the rain to drain away when used outside.
