

TRAY: AZTECK

Design by

Description

Teak is an exceptional wood, refined and timeless. Used in emblematic locations such as the bridges of the very finest ships or Asian temples, it presents excellent technical characteristics: stable, durable, soft to the touch and pleasantly fragrant. It will patinate indoors over time, developing a golden brown hue; outdoors, it will oxidise, which does not alter its properties in any way but which does confer a characteristic silver-grey colour.

Tray in natural (non-oiled) solid teak. Suitable for indoor or outdoor use.
