

ITISY

Design by
Philippe Lemaire

Description

Itisy is an astonishing console table which transforms into a dining table. Its mobility springs from its capacity - thanks to its metal ball joints - for the 4 tops (Ø 54 cm) to be rearranged until they align (W 186) to form a square dining table with approx. 110 cm sides which can comfortably accommodate 4 persons. In each configuration the overall effect is very elegant thanks to the two-legged solid oak bases which are paired with each top and are evocative of traditional stilts.

Top in sawn natural solid oak. Bases in natural varnished solid oak or tops and bases in natural varnished solid American walnut. Grey lacquered metal ball joints.
