

ALLELUIA

Design by
Marie Christine Domer

Description

Low tables composed of an upper top in double-sided smoked mirrored Mirastar glass and a lower top in mirrored safety glass which rests on a base. These tables each have 5 legs H 312 mm (4 legs W 120 mm and 1 leg W 280 mm) in panels of mirror-finish PET-clad MDF between the 2 tops.

The glass used on this table is a semi-reflective smoked toughened glass which gives the upper glass surface variable opacity. As with all types of glass it can be scratched by items harder than itself ; users are thus advised against placing items made of ceramic (e.g. vases) or steel directly on the surface of the glass (both upper and lower surfaces).

In terms of maintenance, both top and posts should only be wiped over with a microfibre cloth dampened with a glass-cleaning product or rubbing alcohol.
