

MON REPOS

Design by
Peter Maly

Description

Low table, the circular top of which appears to be hewn from the material. Its edge is enhanced by a slim rim which helps keep in place any objects displayed on the top; its soft curve is extended in the delicate detailing of its junction with the block legs, the geometric severity of which is tempered by a slight slope. The braced legs, standing solidly on the floor, reinforce the overall impression of stability of a product which is both familiar and solid, effectively designed to last. Sloping legs and top entirely made from solid wood.
