

KOYA

Design by
Marie Christine Domer

Description
Structure in anthracite-stained solid ash; work surface and shelves in matching ash veneered MDF. Two vertical stems in turned solid ash with decorative motif; the taller of the two is topped with a sculpted bird. These uprights are in grey-stained ash with visible graining. As an option, the structure may be fitted with a choice of 2 sets of 4 fabric screens, predefined by the designer. These fabric screens are simply draped over the horizontal bars of the structure, folded in two and held in place by weights, like washing hung out to dry. Thus folded, they guarantee both opacity and intimacy.
