TECHNICAL INFORMATION

DESIGNER: MAURO LIPPARINI

Phantom Dining Table has two distinct characteristics: the top and the horizontal bar underneath. Its glass legs are almost invisible under the thick wooden top making it look like as if it is suspended. The utmost characteristic of this table is the surprising relationship between strength of wood and lightness of the glass base that together create contrast through opacity and transparency. An eye catching piece of furniture in your dining room for a contemporary look and feel.

PRODUCT DETAILS

Base of the table is constructed by using two thick sheets of extra-clear glass held together by a cross carrier solid wood essence veneer. Top is in honeycomb brushed open-pore walnut veneer with solid wood edges.

Color variations:

Wood is a natural raw material. It presents therefore differences in color and structure.

Over time it may be subject to color variations, more or less evident, different depending on the structure of the surface or its position.

To delay this natural process, we recommend avoiding exposing wooden products to direct sunlight.

For the above, the natural variation of the woods, the variations in tonality of colors solicited by environmental or artificial lights, the minimal dimensional variations determined by anomalous rates of humidity or dryness, the veins, knots and other natural characteristics of wood products cannot be considered defects.

NOTES
