WRINKLES & VISUAL APPEARANCE

Due to a combination of the elasticity of the covering, the nature of the interior construction and the design for comfortability of the product, the model may exhibit differing levels of wrinkles.

The models need to be dressed on a regular basis to maintain their appearance and the wrinkles should not be considered as a manufacturing defect, but a natural characteristic of the product.

NOTES

- Model is not available with article Misterbianco (cat. 30).
- Internal metal tubular reinforcement drowned in the molded foam polyurethane that guarantees the round shapes, comfort and resistance over time.

The part below the seat is in structural polyurethane, while the remaining parts are in molded foam.

- All the components of the armchair are interconnected by visible metal tubes in gold satin finish subjected to a polishing and powder painting process.

The special painting represents a protective and decorative coating that guarantees a high resistance to scratching and an exceptional durability and ease of cleaning.

- Rocker and swivel function:
Both the armchair and the footrest have the swivel base.
The rocker function, instead, is guaranteed by a tilt mechanism that is activated by a lever placed under the seat.
This mechanism allows to recline the backrest and the seat.
- Metal feet finishing: GOLD.

NOTES
