GLISS WALK-IN— MDT 2013

1—
12

Gliss Walk-In is a system of walk-in closets allowing to design made to measure compositions, with both linear and corner solutions. Compositions can be wall-mounted with or without back panels (cartapaglia white and anthracite melamine, larix dark, lacquered, glass or mirror finish). The equipment can be freely positioned in height, thanks to a system of concealed, self-locking brackets. A simple design and the wide customisation of the equipment allow solutions for any need.

TECHNICAL INFORMATION

WALL PROFILE

Extruded anodised aluminium.

MELAMINE FACED SHELF/BASE

Wooden particleboard panel faced with melamine. Metal brackets to fasten the shelf to the wall profile. Adjustable feet for the base.

LACQUERED SHELF/BASE

Wooden particleboard panel faced with melamine, painted in the colours of the “Molteni Range”. Metal brackets to fasten the shelf to the wall profile. Adjustable feet for the base.

WOOD SHELF/BASE

Wooden particleboard panel faced with wood veneer in Oak (Quercus), Elm (Ulmus rubra) or Eucalyptus (Eucalyptus globulus). Metal brackets to fasten the shelf to the wall profile. Adjustable feet for the base.

BACK PANEL, DRAWER UNIT STRUCTURE, DRAWER AND TRAY FRONTS, DRAWER SIDES AND BOTTOM (MELAMINE FACED)

Wooden particleboard panel faced with melamine.

BACK PANEL, DRAWER UNIT STRUCTURE, DRAWER AND TRAY FRONTS (LACQUER)

Wooden particleboard panel faced with melamine, painted in the colours of the “Molteni Range”.

BACK PANEL (GLASS VERSIONS)

Wooden particleboard panel faced with melamine, with applied mirror or tempered glass (th. 5 mm), transparent or etched, painted in the colours of the “Molteni Range”.

GLASS DRAWER FRONT

Wooden particleboard panel faced with melamine or painted in the colours of the “Molteni Range”. Tempered glass th. 4 mm.

CLOTHES RAILS

Tube in chrome plated steel. Tube support in chromed plastic.

LATERAL FINISHING PROFILE

Medium density fibre panels faced with melamine paper, painted in the colours of the “Molteni Range”.

SHOE RACK ROD OR TROUSER ROD

In anodised extruded aluminium with plastic insert.

DRAWER INTERIOR

MODULARITY

Methods of executing custom cuttings

In height:

- all vertical profiles (wall-mounted, spacers, finishing profiles) can be reduced to the desired size
- the height of the back panels is custom cut

In width:

- custom reduction up to -614 mm (24 1/8") is available **only on 1 module**
- the minimum possible width for a module is 328 mm
- **the size of trays and modular drawer units cannot be reduced**
- hanging structures can be fastened only to standard compartments with W 942 (37 1/8")

- if a wider shelf is placed on top of any drawer unit (either freestanding, suspended or resting on the base), the drawer unit must be of standard width 942 (37 1/8").
- two drawer units are available for compartments cut to measure (suspended, standing on base or floor standing).

NOTES

- hanging structures with H 110 can contain any tray
- hanging structures with H 206 can contain trays and also a pull-out tray or a H 190 drawer
- drawers, pull-out trays and trinket trays can be freely installed on all other structures, according to the height of the module
- the interiors of the drawers have always a grey saffiano melamine finish
- in case there is no shelf placed over the drawer unit, a 10 mm thick finishing top is always needed
- no shelves can be positioned in the modules adjacent to a drawer unit.

12

Handle in pewter colour finish

Notes

Prices of drawers, trays and pull-out trays include the cost of the pewter colour finish handle. For the handle covered in Eco Skin, add a supplementary charge.

Reductions

- **the size of trays and drawer units cannot be reduced**
- hanging structures can be fastened only to standard compartments with W 942
- if a shelf is placed on top of a drawer unit (either free-standing or resting on the base) the drawer unit must occupy a standard W 942 module.

Drawer units for width custom compartments

To enhance the functional features and adaptability of Gliss Walk-In to all situations, two drawer units H 417/439 with reduced width are available (W 614 for modules cut to measure up to W 642, and W 450 for modules cut to measure up to W 478). These drawer units can be used suspended above the shelf, either supported by the base or floor standing.

Notes

- Besides the instructions concerning the drawer units 942 W, we add following:
- Drawer units always have two wooden drawers H 190
 - The suspended drawer unit can be positioned either on the left or right part of the reduced module.

Recessed LED spotlight for shelves

Features

The spotlight is powered by No. 3 AA batteries (inclusive) and does not need a connection to the electrical system. Lighting is automatic thanks to a volumetric sensor-controlled system. The spotlight has an ON/OFF switch allowing to turn it off when not in use for long periods.

Notes

Tests performed with high quality, non-rechargeable batteries (as the ones supplied with) report a duration of about 1 year when the spotlight is operated for 30 seconds 4 times a day. The use of rechargeable batteries reduces the light intensity of the spotlight.

recessed LED spotlight (batteries included)

W 7 1/4" D 1 5/8"

centrally positioned in the module, even in small module, up to 328 mm

HF1

Led lighting

Shelves can be accessorised with LED lighting. Lighting systems are conformant with European safety standards.

Notes

At the moment of the order, the customer must always indicate on the drawing the shelf or the shelves where the lighting bars should be installed. The bars will always follow the width of the shelf. If the shelf is jointed, two bars will be made, one for each part of the shelf.

lighting bars for shelves

consider two singles bars for jointed shelves

for shelves up to W 1012 - 39 7/8"

watt 12
EBI10

for shelves up to W 1954 - 76 7/8"

watt 22
EBI20

for shelves up to W 2896 - 114"

watt 33
EBI29

each power supply kit can turn on max 6 bars that do not go over 100 W.

If this wattage is surpassed, two or more kits must be purchased.
