

MIRROR: VANITY SHELF

Design by
Outofstock

Description

The Outofstock design collective loves to play with geometric forms and their combinations: in the case of the VANITY SHELF mirror/storage, suspended on a hook by a single leather strap, they sought to achieve the perfect balance - both literally and figuratively - between the two forms (circular and rectangular) and their functions (mirror and shelf storage). Each element finds its rightful place in relation to the other. VANITY SHELF may be installed in a hallway as a mirror/trinket holder, or in a bathroom as a mirror/shelf.

Structure of round mirror and rectangular shelf storage in black lacquered aluminium. Both are suspended from a black lacquered steel hook via a natural-coloured leather strap which encircles each element. The dimensions indicated are the overall dimensions of the piece. The diameter of the mirror is 30 cm; the shelf is 47 cm high and 24 cm wide.
