Harmony project

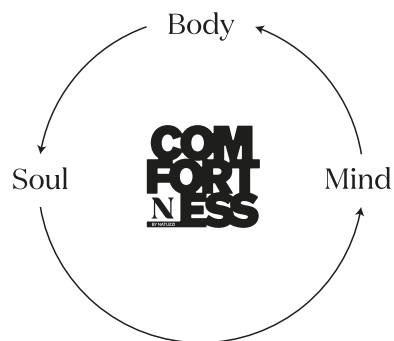

Natuzzi Italia

The Harmony Project aims to offer a unified working method that ensures chromatic and stylistic harmony, preserving the brand's DNA.

This tool is intended to be more than just a product offering, aiming to harmonize an entire interior design project.

Re-Vive

At Natuzzi, we dream of a more comfortable world. Our passion is to make you feel better. A chair is not just an object; it represents something about you. The Re-Vive chair is designed to move with you and to move you. Created by our Natuzzi Design Center in partnership with Formway Design, the Re-Vive offers a perfect balance of physical and mental relaxation. The transition from standing to sitting, to reclining, is fluid and comfortable. Re-Vive creates a physical pause, providing ergonomic support in all positions.

Comfortness is the Natuzzi philosophy that harmonizes mind, body, and soul, generating deep well-being for the individual.

Design by Natuzzi Design Center and Formway Design

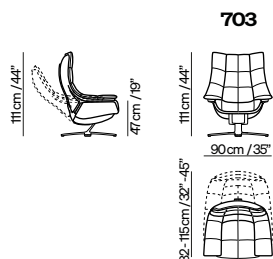

At Natuzzi's headquarters in Puglia, the Design Center's mission is to harmonize design and functionality, aiming to generate well-being and comfort.

Choose your Re-Vive

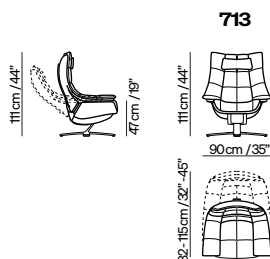

Introducing the Quilted Revive Performance Armchair, now available in both queen and king sizes, with the option to include a footrest. This extremely versatile armchair also features an optional sliding headrest, which offers seamless adjustment through a simple sliding action to suit your posture and preferred support position. Experience ultimate comfort and style with the Revive Performance Armchair.

The Re-Vive
performance recliner
is composed of 120
essential components,
80 of which are uniquely
tailor made to offer
ease of motion.

World's first
performance recliner

Made in the Natuzzi
factories in Puglia

No power needed

Technical features

Relax is a personal feeling that has a thousand nuances and Re-Vive embraces them all. Everyone can indulge in complete relaxation that suits his or her style. Traditional recliners are operated with lever mechanisms. We set out to change that – to design a recliner that would offer complete support as well as intuitively respond to movement, to deliver a new kind of comfort. Re-Vive moves as you move. It flexes as you change position, responding to what you do naturally.

Responsive Recline

Re-Vive adapts to your movement with a mechanism that responds to your posture for continuous support.

Flex Back

Three distinct actions working in unison to provide smooth movement.

Swivel base with oscillating movement

Re-Vive's swivel base allows for 360-degree movement, providing full freedom to your body and the ability to rock fluidly.

Sliding Headrest (optional)

The adjustable headrest of Re-Vive easily adjusts to your position, ensuring total relaxation.

Comfort Cushion

Re-Vive's handcrafted leather cushions mold perfectly to the body, adapting to changes weight.

Fluid Motions

Roller and ball technology enables smooth movements and frictionless, to move from one position to another with ease.

Dynamic Arms

The armrests follow the natural movement of the body, allowing the arms to be extended in any position.

Tilting Ottoman

Designed to fit your body lines perfectly, it promotes maximum comfort and total support for your legs.
