## TECHNICAL INFORMATION

---

designed by Ar-o studio

Papel, as the name transpires, is a collection of loom-woven paper yarn rugs. Paper has a completely different appeal than other materials.

It is a natural and sustainable material that is easy to clean and made from FSC and PEFC paper yarns (international certifications that guarantee the sustainable management of source forests and value creation for producers).

Paper yarn carpets are protected by industrial dirt-repellent treatment.

The treatment forms a protective film on the surface and prevents dirt from absorb into the paper fiber.

Technique: Hand made
