TECHNICAL INFORMATION

Campus collection, designed by Mauro Lipparini, reinterprets the evergreen and contemporary design of the living area as well as in the new bedroom area proposal.

The new Campus night program combines furnishings and bed and creates a new interior proposal with chest of drawer, dressers and functional bedside tables.

It rewrites the function of the bedroom and expresses the details of the craftsmanship with a contemporary key .

Technical features:

- Chest of drawer, dresser and bedside tables have a laser cut base, polished and liquid painted in glossy black chrome
- The metal base features details with eucalyptus wood inserts
- Chest of drawer and dresser are made with high density fiber panels in eucalyptus wood
- Solid wood details for edges and front drawers
- Top in high glossy brick lacquer
- Internal drawers in matt colour
- The drawers are equipped with side opening with soft closing
- The night system includes two versions of bedside tables: a version made of eucalyptus wood with inserts and solid wood details and a hexagonal version with container in glossy lacquer and sliding top, to allow total opening of the storage. The internal part of the bedside table is available in matt lacquer, ton on tone.

Made in Italy collection.
